

Mochammad Farhan Cahya Putra

IT Business Analyst | Requirements Analysis | Agile/Scrum | Stakeholder Management | SQL & API Integration
Jakarta, Indonesia | +62 813-8888-3231 | farhan.cahya@outlook.com | [linkedin.com/in/mfarhancp](https://www.linkedin.com/in/mfarhancp)

PROFESSIONAL SUMMARY

IT Business Analyst with 5+ years of experience in requirements analysis, process improvement, and stakeholder management across FinTech, job portal platforms, securities trading, and enterprise systems. Skilled in translating business needs into technical specifications using BRD/FRD documentation, user stories, BPMN process mapping, and SQL data validation. Experienced in Agile/Scrum delivery and collaborating with cross-functional teams to deliver measurable business outcomes.

PROFESSIONAL EXPERIENCE

BNI Sekuritas | *Investment Banking & Securities — Jakarta, Indonesia*

IT Business Analyst Jan 2025 – Dec 2025

- Platform enhancement delivery was delayed by unclear requirements; **conducted requirements elicitation workshops and created comprehensive FRD/TSD** aligned with OJK/IDX regulatory standards, contributing to 20% reduction in feature delivery time.
- Back-office trading workflows involved excessive manual reconciliation steps; **performed gap analysis and created BPMN process maps** identifying 5 redundant activities, supporting 25% improvement in operational efficiency.
- Sprint planning lacked structure across 150+ user stories; **implemented backlog grooming practices in JIRA (Agile/Scrum)** improving sprint predictability and contributing to on-time delivery of 10 platform features.
- Trade routing data quality issues caused processing delays; **developed SQL validation queries on PostgreSQL** improving data accuracy and reducing incident response time from 6 hours to 3 hours.

KOLTIVA | *Series B Agritech Startup (\$50M+ raised) — Jakarta, Indonesia*

Lead Business Analyst Nov 2022 – Dec 2024

- Farmer lending disbursement process took 3-5 days affecting cooperatives; **led requirements gathering for KoltiPay-Artajasa payment gateway integration** contributing to faster disbursement (from days to hours) and supporting operational cost reduction.
- UAT planning for 200+ user stories across 6 sprints needed coordination; **organized pilot UAT with 10 cooperatives and created test documentation** achieving 90%+ test pass rate and facilitating smooth production rollout.
- Rural connectivity caused intermittent payment failures; **documented offline-first data flow requirements** supporting engineering team in implementing queuing mechanism that reduced transaction failures by 30%.

BIONIC TEKNOLOGI INDONESIA (Klikjob.com) | *Job and Freelancer Platform — Jakarta, Indonesia*

Business Analyst Jul 2020 – Oct 2022

- Employer job posting workflow had 8 steps with user drop-off issues; **conducted user journey mapping and created simplified workflow BRD** supporting UX redesign that reduced steps to 5 and improved posting completion rate by 35%.
- Candidate-job matching accuracy was suboptimal based on recruiter feedback; **collaborated with data team to define 10+ matching parameters (e.g., skill, weighting, location proximity and rules) in requirements document** contributing to algorithm improvements that increased match relevance scores.
- Payment gateway integrations (Midtrans, Xendit) experienced transaction failures; **documented API requirements and error-handling specifications** supporting technical team in reducing payment failure rate from 18% to 6%.
- Mobile app feature gaps caused user complaints; **created feature-parity analysis and wrote 70+ user stories across 4 sprints** enabling mobile app improvements that increased monthly active users from 40K to 85K.

ZKTeco Indonesia | *Global Biometric Security Solutions Provider — Jakarta, Indonesia*

Business Analyst May 2017 – Jun 2020

- Biometric access control deployments lacked standardized requirements; **created API specification documents for 15+ releases across Bank Mandiri and Bursa Efek** contributing to system reliability improvements and supporting 99%+ uptime for 200+ daily users.
