

Mochammad Farhan

IT Business Analyst | FinTech, Securities & Payments | API Integration & Regulatory Compliance | SQL
Jakarta, Indonesia | +62 813-8888-3231 | mfarhancp13@gmail.com | linkedin.com/in/mfarhancp

PROFESSIONAL SUMMARY

Results-driven IT Business Analyst with 5+ years delivering end-to-end requirements engineering across FinTech, securities trading, and regulated payment domains. Core strengths: API integration strategy, SQL-based data validation, Agile/Scrum delivery, and OJK/IDX regulatory compliance. Seeking a Senior BA or Product Owner role to leverage deep domain expertise and cross-functional leadership.

PROFESSIONAL EXPERIENCE

BNI Sekuritas | *Investment Banking & Securities — Jakarta, Indonesia*

IT Business Analyst Jan 2025 – Dec 2025

- Delivery bottleneck on BIONS multi-investment platform caused 30% delays; **led requirements elicitation & FRD/TSD documentation** aligned with OJK/IDX compliance, cutting feature cycle time from 10 weeks to 8 weeks.
- Back-office workflows consumed 4+ hrs/day in manual reconciliation; **conducted gap analysis & BPMN mapping** eliminating 5 redundant steps, reducing manual work by 35% and achieving 100% IDX compliance.
- Sprint velocity stalled across 150+ user stories; **implemented structured JIRA backlog (Agile/Scrum)**, increasing velocity by 20% and delivering 10 features on-time in Q3 2025.
- Trade routing data on PostgreSQL was inconsistent; **built SQL validation scripts** improving accuracy by 20%, reducing errors by 25/month, and cutting MTTR from 6 hrs to 3 hrs.

KOLTIVA | *Series B Agritech Startup (\$50M+ raised) — Jakarta, Indonesia*

Lead Business Analyst Nov 2022 – Dec 2024

- Farmer lending took 3–5 days for 15,000+ cooperatives; **spearheaded KoltiPay–Artajasa integration** reducing costs by 35%, disbursement time by 70%, and achieving transaction success rate >90% post-launch.
- UAT coverage for 200+ user stories was at risk; **led pilot UAT with 10 cooperatives** achieving 92% first-time success rate; trained 50+ field officers via structured documentation.
- Rural connectivity caused intermittent API failures; **designed data flow with offline queuing** between KoltiPay & Artajasa, reducing transaction failures by 40%.

First Discovery | *Software House — Banking & Insurance — Jakarta, Indonesia*

Business Analyst Jul 2020 – Oct 2022

- Requirement defects across 10+ features were high; **implemented RTM & stakeholder alignment** reducing defects by 35% and defect cycle time by 4 days.
- Bank Mandiri KYC lacked structured requirements for OJK audit; **translated 47-page regulation into 80+ user stories** with minimal critical UAT defects — securing first-submission approval.

ZKTeco Indonesia | *Security Solutions Provider — Jakarta, Indonesia*

Business Analyst May 2017 – Jun 2020

- Biometric access across Bank Mandiri & Bursa Efek lacked centralized specs; **defined requirements for 15+ releases** reducing unauthorized access by 60%, maintaining 99% uptime for 200+ daily traders.
